

## Radiometer Analytical Probes

RADIOMETER ANALYTICAL develops and manufactures an extensive range of electrochemical electrodes - combined pH, glass or reference electrodes, metal electrodes, ion-selective electrodes and conductivity cells - for every application and budget.

Electrodes are manufactured using a blend of traditional know-how and state-of-the-art technology: e.g. the RED ROD technology - a unique concept developed by RADIOMETER ANALYTICAL which ensures fast response time across a wide temperature range.

Part Number	Parameter	Type	Compatible instruments	Connector	Recommended for	AED Price
E11M004	pH	Lab, external reference probe needed	MeterLab & sensION+ GLP lab	Screw cap	Alkaline samples	
E11M006	pH	Lab, red rod, external reference probe needed	MeterLab & sensION+ GLP lab	BNC	General purpose	
E16M300	pH	Lab, combined electrode	MeterLab & sensION+ GLP lab	BNC	Brewery, Pool & Spa, Seawater	
E16M343	pH	Lab, combined electrode	METERLAB & SENSION+ GLP lab	BNC	Micro samples, small volumes, 3 mm diameter
